

## District Playoff Model 2019

### All Teams seeded by formula

The formula:

5 points for each win

1 times the winning percentage of the teams you beat for each win times 10

The winning percentage of the other teams on your league (take yours out) times 5

Add all three numbers and divide by the scheduled number of league games

This will yield your seeding score which will be compared to the other teams in your classification to determine seeding position.
